

UC RIVERSIDE - Faculty Instruction Evaluation (iEval) Spring 2011

Course: MATH 150A Section: 001 - INTERMEDIATE ANALYSIS
Instructor: Jason McCullough

Question # 25: Please comment on how the instructor's teaching helped your learning of the material in this course. Please give serious thought to your comments. Your comments will be studied by the professor after the grade and performance evaluation of your work have been submitted and may be used in changing future offerings of the course. In addition, these comments are placed in the instructor's file and maybe used for purposes of evaluating the instructor's teaching. The information collected will remain anonymous.

- Best Math professor I've had at UCR so far. Really delivers the content well. Been dying to take him since he substituted for my geometry class. Delivers lesson clearly and most effective, goes against the book if need be.
- I've had Dr. McCullough all year and I feel like I can't rave about him enough. The way he teaches the material is really organized and in a way that flows well. He's always willing to help, even if the class doesn't jump on the opportunity =) If I could, I would take every math class with him. His random comments on the work are entertaining and cute and I really like them. The only thing I would say something about is discussion. Having us do the problems is a lovely concept--but sometimes, for a class that's kind of difficult like this one, I sometimes felt like it would be beneficial to have the TA help us with various other aspects of class. Maybe mixing it up between having the TA do something and having the students do problems would be better than having us do it all the time. That being said, I would take any class Dr. McCullough was teaching, doing problems in discussion or not =)
- He did a really good job of synthesizing a lot of very challenging information into a really understandable format.
- Professor was great, just the book is terrible. Text is too small and the examples within the book were not helpful.
